

Specifications For Custom Fabricated Helmets

Due to the unique and individual nature of custom helmets, the following specifications are needed **BEFORE** evaluating the feasibility of fabricating a helmet for special head shapes, sizes, and conditions. Once this data is received, we can then provide a price quotation, as a customization fee will be applied.

1. **MEASUREMENTS** - refer to **CUSTOM HELMET MEASUREMENT CHART**
2. **PLASTER CAST OF HEAD** - (As this step may **NOT** be necessary, consult with a Danmar representative first.) Use Johnson & Johnson plaster bandages or the equivalent. The cast must conform to the areas of the head that are to be covered by the helmet. The edge of the cast will be the edge of the helmet. Ear locations must be clearly marked, as well as the area to be cut out.
3. **PHOTOGRAPHS** - Clearly showing the head with close up of right and left sides, also front and back.
4. **FACE GUARD OR FACE BAR** - If either of these is requested, please provide the following information: Make a sketch of the face, clearly indicating the eye, nose, and mouth positions, and the measurement from eyebrow level to point of chin.

NOTE: *Fit may range from snug to slightly loose, because there can be small variations that occur in the manufacturing process, in the raw materials, and/or a shrinkage factor. Hair styles will also affect the fit.*

IMPORTANT:

*Please note that custom helmets are **NOT** returnable.*
