

Q300M Mini

zippie®

# Q300M Mini

Imagine the Possibilities

The sky's the limit with the ZIPPIE Mini's ultra-compact base and small turning radius.

# Q300M Mini

Imagine the places they will go

## Imagine Independence

Your child can move shoulder to shoulder with family or friends while driving 3 MPH (walking speed). A smooth riding drive suspension is always active, no matter what seat elevation you drive from. Your child will be able to steal cookies from cabinets, write on the chalkboard, and give you smooches at your level.

Tight places, such as classrooms or busy living spaces and narrow doorways won't slow down the exploration and fun. The TRUE mid-wheel drive technology allows the ZIPPIE Mini to turn on the spot for intuitive and easy driving, providing the best indoor maneuverability.

Additional base color options seen here, offered by Built-4-Me.

## Imagine your style

Personalize the ZIPPIE Mini with accent colors or choose from a shroud color for a bit more color.
